F. No.PA/Dir/Glanders/ 3696  
Date: 15 November 2016

To  
The Director  
Department of Animal Husbandry (Govt. of Rajasthan)  
Pashudhan Bhawan, Tonk Road  
Jaipur-328 001 (Rajasthan)

Sub: Incidence of glanders in equines in Rajakhera Block, Distt. Dholpur, Rajasthan-reg  
Sir,

This is with reference to your letter no. 1569 dated 03.11.2016 from Joint Director, State Disease Diagnostic Centre, Department of Animal Husbandry, Gopinath Marg, Panch Batti, Jaipur (Rajasthan) sending us four serum samples for glanders testing. Four animals were found positive for glanders (details enclosed). Necessary actions under the provisions of Infectious Diseases Act 2009 (Prevention and Control of Infectious and Contagious Disease in Animals Act 2009) in vogue in the State may be taken immediately. The equines housed with glanders positive horses in the same premises may be monitored for the disease by serological testing under strict supervision of the veterinary authority and must also be segregated immediately.

In light of these results and viewing the lingering of this notifiable disease, it is recommended that equine movement to and from this and adjoining areas be regulated strictly and to take necessary precautions and zoo-sanitary measures to prevent further spread of the disease on top priority. The equines in adjoining areas may also be tested for glanders. NRCE being the referral laboratory of Department of Animal Husbandry, Dairying and Fisheries, MOAFW, GOI, is available to help by providing the testing services on priority, please.

Action (s) taken and disease situation amongst equines in the area may be monitored and intimated at regular intervals.

Yours faithfully,

(B.N. Tripathi)
